Anastasiia Shcherbula
Front-End Developer

Lover of beautiful websites and design. The main stack is development in React, where every detail can be customized to your liking. Being in the south of Portugal, I love morning walks on the beach when no one is around. Perseverance and the desire to achieve goals is my philosophy. Having tried many fields, programming turned out to be my calling. I'm constantly looking for inspiration on Pinterest, and if I don't have it, I just create something unique. I completed GoIT courses, where I was a Scrum Master, actively communicated and supported the team. In addition to developing websites, I also have experience as a Scrum Master. This role allowed me to actively interact with the development team and ensure an efficient workflow. As a Scrum Master, my job was to support the team, ensure adherence to the Scrum methodology, and improve development processes. I worked with the Trello board and was responsible for task management, sprint planning, and providing the team with the necessary resources. I also played an active role as an encourager, maintaining the spirit of teamwork and motivating team members to achieve common goals. My experience as a Scrum Master has given me a better understanding of the importance of team collaboration, project management, and efficient use of resources. It was a unique experience that complemented my skills in web development and teamwork.

Projects

- KinoCat (movie site) (Github) [HTML, CSS, JS, React];
- Space-cats (team project) (Github) [HTML, SASS, JS, Parcel];
- Congenial octo lamp (furniture store) (Github) [HTML, CSS, JS, React, REST API];
- Working with API (Github) [Axios, REST API];
- Cat forest (Github) [HTML, CSS, JS, REST API];

Work Experience

Junior front-End Developer
CatSoft

August 2023 – present time | Poland

In my current position as Junior Front-End Developer, my work involves creating and maintaining web applications using HTML, CSS, and JavaScript. I actively develop user interfaces using the React library and using the SCSS preprocessor for styling. My job is to ensure high quality code and collaborate with the team to achieve overall project goals.

Education

Web academy Go It
Frontend javascript developer

February 2023 - October 2023 | Ukraine

State University of Economics and Technology
Management

September 2016 - June 2019 | Ukraine
